

So Happy

WHAT MAKES SO HAPPY SO AWESOME?

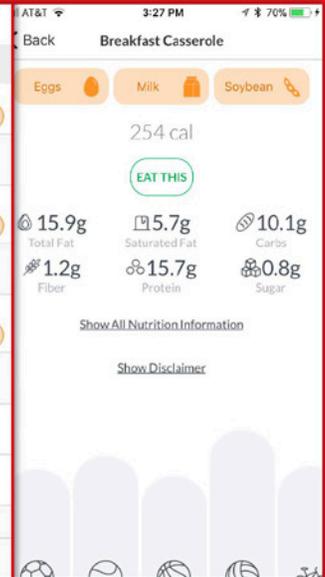

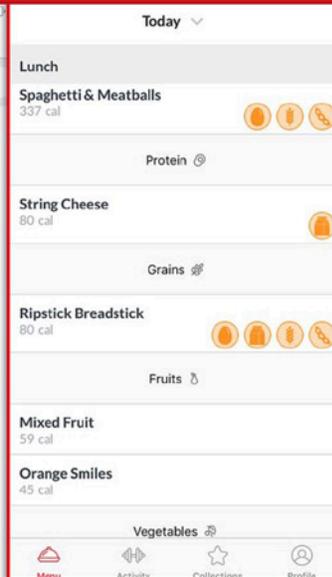

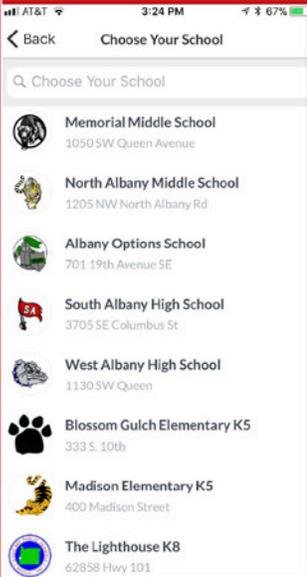

So Happy is an app to show menu and nutritional information available at your Sodexo cafeteria.

sodexo
QUALITY OF LIFE SERVICES

IT'S A REALLY COOL APP

So Happy shows parents and students everything we are serving in our cafeteria. What's great is that our consumers see ONLY our menu, and the details of what we are serving during that week.

PEOPLE LOVE TO USE APPS

People use their phones to perform an average of 221 tasks every day! Obviously when they want to know something, they turn to a mobile device.

So Happy puts students' menu options where they want it to be. They can see what's on the menu before they enter your cafeteria, or start their day for that matter.

ALEXA ENABLED

Easily hear what's being served. Just say, "Alexa, ask So Happy what's for lunch today?"

SO HAPPY MAKES PEOPLE'S LIVES EASIER

So Happy

Every student walks through the cafeteria to see the options, and then they circle back to make a choice. You can follow their journey, and you can see their stress when they can't decide.

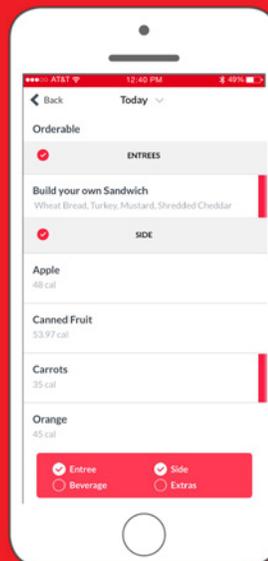

And now, more than ever, students and parents want to understand what's in their meal - the ingredients, and especially the nutritional and allergen information. So Happy provides a level of transparency previously unknown to our industry, with clear product descriptions and graphical representations for every nutritional category. There's no more guessing when comparing one product to another.

IT SAVES EVERYONE'S TIME

When a student or parent has a nutritional question, it may be hard for them to get a fast answer. We might direct them to a website or a third party app where they'll have to search for the item. Now So Happy puts the power in the hands of the parent and student, allowing them to find nutritional information quickly and make the decision that's best for them.

PRE-ORDER, SAVE TIME

Students and staff can use the app to pre-order their meals up to a week in advance, skip the line and spend more time enjoying lunch. Use the app to re-order a previously ordered meal combination to save even more time. It's that easy!
